SUMMARY

I am a Ukrainian front-end developer with experience in working on several projects.

I am looking for my first job to work as a front-end developer and deepen my front-end development knowledge.

I am passionate about creating fresh and beautiful web interfaces and enhancing user experience.

SKILLS

Front End
React, JavaScript, Stimulus, SCSS, Bootstrap

Back End
Ruby on Rails, PostgreSQL

Tools
Git/Github, Figma, Trello

PROJECTS

FoodMood, https://www.food-mood.online/
Mobile-first web application for finding new interesting recipes, when you don't know what to cook.

The team consisted of 3 members:
2 backend developers, and 1 frontend developer(me)

Performed tasks:
- UI/UX design in Figma
- UI development
- User-interaction components development
- Responsive design implementation
- Collaboration with back-end developers for improving usability
- Project managing with Trello
- Participated in planning sessions

Rent-a-pet, http://rent-a-pet-1000.herokuapp.com/
Web application for trying out pets before adopting them from a shelter.

The team consisted of 3 members:
2 backend developers, and 1 frontend developer(me)

Performed tasks:
- UI/UX design in Figma
- UI development
- User-interaction components development
- Responsive design implementation
- Collaboration with back-end developers for improving usability
- Participated in planning sessions
